

## ATyS d M

Remotely operated Transfer Switching Equipment from 40 to 160 A

## Function

ATyS d M are single－phase or three－phase transfer switches that are remotely controlled using volt－free contacts from an external controller．They are modular products with positive break indication．They are intended for use in low voltage power supply systems where a brief interruption of the load supply is acceptable during transfer．

## Advantages

## Secure operation

ATyS M products provide electrical and mechanical interlocks for optimum safety． The product also provides positive break indication，confirming switch position with dual mechanical indicators for increased safety．

## Fast transfer

ATyS d M are based on coil and technology with rotative contacts，therefore ensuring an extremely short black－out duration（＜90ms）．

## High performance

ATyS M are compliant with IEC 60947－6－1， the standard governing transfer switches．The AC 33B characteristic up to 125 A makes it possible to use the same product for resistive and inductive loads．

## Immune to network voltage fluctuations

The power supply of the ATyS d M is only active during transfer．As the product is based on stable positions，it is not affected by network voltage fluctuations．

Powering modern work and life

## The solution for

＞Applications with an external ATS／AMF controller
＞Building Management Systems（BMS）

## Strong points

＞Secure operation
＞High performance
＞Fast transfer times
＞Immune to network voltage fluctuations

## Conformity to standards

$>$ IEC 60947－6－1
$>$ IEC 60947－3
$>$ GB 14048.11

## Approvals and certifications

## KEMA NEUR

Modes of operation

Easy selection of AUTO／ MANUAL mode

Back－up manual operation

Padlocking facility

## What you need to know

## Electrical control

The positions are controlled by volt-free contacts which may come from an external automatic ATS controller (such as the ATyS C30), PLC, BMS or even simply using pushbuttons.
The power section switch positions are stable, with or without a supply present.

## Control logic

Two types of control logic are available:

- Impulse logic
- A switching command of at least 60 ms is necessary to initiate operation.
- Command I and II have priority over command 0.
- The first command (order) received (I or II) has priority as long as it remains present.

## Power supply

ATyS d M is equipped with two independent 230 VAC auxiliary power supply inputs (176-288 VAC), $50 / 60 \mathrm{~Hz}(45 / 65 \mathrm{~Hz})$.
These two power supplies may be and are intended to be connected individually. One to switch I and the other to switch II:

- Power supply 101-102 must be available to reach position I
- Power supply 201-202 must be available to reach position II.

The use of a dual power supply (DPS), or an external uninterrupted power supply module, provides the full security of the 3 position commands with the availability of any supply.
In this case, both supply inputs must be connected in parallel in order to be supplied.

> ATyS t M - ATyS g M Automatic Transfer Switching Equipment from 40 to 160 A

Function
ATyS t M and ATyS g M are three-phase (4P) automatic transfer switches with positive break indication. The ATyS g M is also available in 2P for single phase applications.
The ATyS t M and ATyS g M both include ATyS d M functionality together, with an integrated controller for automatic transfer dedicated to mains/mains applications (ATyS t M) and mains/ genset applications (ATyS g M). They are intended for use in low voltage power supply systems where a brief interruption of the load supply is acceptable during transfer.

## Advantages

## Fast commissioning

ATyS t M and g M transfer switches offer significant time saving during commissioning (the process takes 2 to 3 minutes). Thanks to the design that allows commissioning through just one potentiometer (4 on the ATyS g M) and four DIP switches, a screwdriver is all that is required to configure the parameters.

ATyS g M: specifically designed for mains/ genset applications
The ATyS g M integrated controller has been designed to provide specific functions for these applications (genset startup, tests on load...) together with the monitoring of the voltage and frequency of both sources for three-phase and single-phase networks.

ATyS t M: specifically designed for mains/ mains applications
The ATyS t M integrated controller has been designed to provide all the functions necessary for these applications (operation with or without priority, preferred source selection) together with the monitoring of the voltage and frequency of both sources for three-phase networks.

## Secured configuration settings

In order to prevent any risk of unintended change to the configured settings, a sealable cover is available as an accessory.

## The solution for

> High Rise Buildings
> Data centre
> Healthcare buildings

## Strong points

> Fast commissioning
> ATyS d M functions plus an integrated ATS controller dedicated to mains/mains or mains/genset applications
> Secured configuration settings

## Conformity to standards

$>$ IEC 60947-6-1
$>$ IEC 60947-3
$>$ GB 14048.11

[^1]

## Function

ATyS p M are single-phase or three-phase automatic transfer switches with positive break indication.
Functions include ATyS t M and ATyS g M capability, with additional programmable parameters and a triggering function. A product model with communication is available. They are intended for use in low voltage power supply systems where a brief interruption of the load supply is acceptable during transfer.

## Advantages

Flexible programming
ATyS p M time delays and inputs/outputs are completely configurable, hence enabling the easy monitoring of specific applications (load shedding, test...) and the definition of an operating cycle specifically adapted to your application.

## Trip function

ATyS p M provides a function for transferring the load to the 0 position in case of loss of both power supply sources (tripping). In this way the load is protected from issues due to source instability.

## Communication and configuration

A specific version of ATyS p M is available with integrated Modbus communication. This gives acces to most product data (status, voltages, frequencies...).
A user friendly configuration software is also available free (Easyconfig) to configure, view and save all the parameters in the ATyS p M.

## Remote control interface

Specifically designed for installations where the product is enclosed, the remote interface displays product status on the front panel (D10) or displays and controls with access to programming (D20).

## The solution for

## What you need to know

The ATyS p M are automatic transfer switching equipment that include a fully integrated ATS controller. These products are self powered from incoming supplies: 230 VAC (160-305 VAC), $50 / 60 \mathrm{~Hz}(45 / 65 \mathrm{~Hz})$. Automatic products are all equipped with a sequence logic. Here is an example of the sequence logic in case of loss and return of the preferred source.

## Easyconfig

The Easyconfig software is the ideal solution to save time and simplify complex configuration.

Typical parameters that can be set:

- the application type,
- voltage/frequency thresholds,
- timers,
- inputs/outputs...

## Mounting

 once.
## Auxiliary contact

For upstream and downstream protection of three-phase products (4 P), please order the reference twice. For the single-phase products (2 $P$ ) please order the reference
(1) Reference composed of 2 pieces (4P).

## Use

Auxiliary contacts for position indication. A maximum of two auxiliary contact blocks can be fitted to each product. Each auxiliary contact block integrates 3
NO/NC auxiliary contacts, one per position (I, O, II).

| Rating (A) | Type | Reference |
| :--- | :---: | :---: |
| $40 \ldots 160$ | Separate common connection | $1309 \mathbf{0 0 0 1}$ |
| $40 \ldots 160$ | Linked common connection | $1309 \mathbf{0 0 1 1}$ |

The ATyS d M s is supplied with one auxiliary contact block fitted as standard; This A/C block has separate common points.

## Characteristics:

250 VAC / 5 A maximum.
24 VDC / 2 A maximum.

## Sealable cover

Use
Prevents access to the ATyS t M and g M configuration panel (seals and screws are included).

| Rating (A) | No. of poles | Reference |

| $40 \ldots 160$ | $410 \times 305 \times 150$ | $1309 \mathbf{9 0 5 6}$ |

## Auto-transformer

Use
For use with ATyS p M in 400 VAC three-phase applications that does not have a distributed neutral. The ATyS p M includes integrated sensing and power supply circuits, therefore a neutral connection is required for 400 VAC three-phase applications. When no neutral connection is available this autotransformer ( $400 / 230 \mathrm{VAC}, 400 \mathrm{VA}$ ) provides the 230 VAC required for the ATyS to function.

| Rating (A) | Reference |
| :--- | :---: |
| $40 \ldots 160$ | 15994121 |

## Double power supply - DPS

## Use

Allows an ATyS d M to be supplied by two 230 VAC, $50 / 60 \mathrm{~Hz}$ networks to have full control in terms of transfer to and from any position with any one of the power supplies available.

## Input

- The input is considered "active" from 200 VAC.
- Maximum voltage: 288 VAC.
- Internal protection: each input is fuse protected 3.15 A.
- Connection on terminals: max. $6 \mathrm{~mm}^{2}$.
- Modular device: 4 module width.

| Input 1 | Input 2 | Output |
| :---: | :---: | :---: |

Remote interfaces for ATyS p M

Use
To remotely display source availability and position indication typically used on the front of a panel when the ATyS M is enclosed.
The remote interface is powered directly from the ATyS M via the RJ45 connection cable.
Maximum cable length: 3 m .

## D10

To display source availability and position indication on the front panel of an enclosure.

Protection degree: IP21 D20
In addition to the functions of the ATyS D10, the D20 displays measurements and enables control and configuration from the front of the display panel.
Protection degree: IP21

## Door mounting

2 holes $\varnothing$ 22.5.
ATyS M connection via RJ45 cable, not isolated. Cable not provided

Connection cable for remote interfaces

Use
To connect between a remote interface (type D10 or D20) and an ATyS p M.

Reference
95992010
95992020

## Characteristics:

RJ45 8 wire straight-through, non isolated cable. Length 3 m .

| Type | Length | Reference |
| :--- | :---: | :---: |
| RJ45 cable | 3 m | 15992009 |

## Power connection terminals

Use
The power connection terminals allow conversion of the cage terminals into bolt-on type connection terminals, enabling connection of up to two $35 \mathrm{~mm}^{2}$ cables or one $70 \mathrm{~mm}^{2}$ cable. Each power connection terminal is provided with separation screens.

1 preferred source (network)
2 alternate source (network)
1: position 0 control
2: preferred source selection
3: automatic mode inhibition
6: availability S1 or S2
A: bridging bar (accessories)
B: auxiliary contact block - 1 NO/NC
contact per position I, 0, II (accessories)

1 preferred source
2 alternate source
1: manual retransfer / priority change
2: test on load
3: automatic mode inhibition
6: product availability relay
7: genset start / stop control

A: bridging bar (accessories)
B: auxiliary contact block - 1 NO/NC contact per position I, 0, II (accessories)

Three-phase ATyS p M

[^4]1-2-3: programmable inputs
4-5-6: programmable outputs
7: genset start / stop control
8: RJ 45 for connecting a D10/D20 remote interface
9: RS485 for communication on versions with COM.
A: bridging bar (accessories)
B: auxiliary contact block - 1 NO/NC contact per position I, 0, II (accessories)

Characteristics according to IEC 60947-3 and IEC 60947-6-1
40 to 160 A

| Thermal current $\mathrm{I}_{\text {th }}$ at $40^{\circ} \mathrm{C}$ | 40 A | 63 A | 80 A | 100 A | 125 A | 160 A |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Rated insulation voltage $\mathrm{U}_{\mathrm{i}} \mathrm{M}$ (power circuit) | 800 | 800 | 800 | 800 | 800 | 800 |
| Rated impulse withstand voltage $\mathrm{U}_{\text {imp }}(\mathrm{kV})$ (power circuit) | 6 | 6 | 6 | 6 | 6 | 6 |
| Rated insulation voltage $U_{i}(\mathrm{~V})$ (operation circuit) | 300 | 300 | 300 | 300 | 300 | 300 |
| Rated impulse withstand voltage $\mathrm{U}_{\text {imp }}(\mathrm{kV}$ ( (operation circuit) - ATyS dM | 4 | 4 | 4 | 4 | 4 | 4 |
| Rated impulse withstand voltage $\mathrm{U}_{\mathrm{imp}}(\mathrm{kV}$ ) (operation circuit) - ATyS $\mathrm{M}, \mathrm{g} \mathrm{M}$ and pM | 2.5 | 2.5 | 2.5 | 2.5 | 2.5 | 2.5 |
| Rated operational currents $\mathrm{I}_{\mathrm{e}}(A)$ according to IEC 60947-6-1 |  |  |  |  |  |  |
| Rated voltage Utilisation category | A/B ${ }^{(1)}$ | A/B ${ }^{(1)}$ | A/B ${ }^{(1)}$ | A/B ${ }^{(1)}$ | $\mathbf{A} / \mathbf{B}^{(1)}$ | A/B ${ }^{(1)}$ |

| Durability (number of operating cycles) | 10000 | 10000 | 10000 | 10000 | 10000 | 10000 |
| Weight of single-phase versions - without packaging (kg) | 2.8 | 2.8 | 2.8 | 2.8 | 2.8 | 2.8 |
| Weight of single-phase versions - with packaging (kg) | 3.5 | 3.5 | 3.5 | 3.5 | 3.5 | 3.5 |
| Weight of three-phase versions - without packaging (kg) | 3.5 | 3.5 | 3.5 | 3.5 | 3.5 | 3.5 |
| Weight of three-phase versions - with packaging (kg) | 4.2 | 4.2 | 4.2 | 4.2 | 4.2 | 4.2 |

[^5](4) Value for coordination with any circuit breaker that ensures tripping in less than 0.3 s . For coordination with specific circuit-breaker references, higher short-circuit current values are available. Please consult us.
(5) At rated voltage - excluding time delays and loss of source detection time when applicable.

[^0]:    (1) The three-phase version (4P), for upstream and downstream protection, please order the reference twice. For the single-phase version (2P) please order the reference once.
    (2) 1 NO/NC contact block for positions I, $O$ and II.

[^1]:    (1) The three-phase version (4P), for upstream and downstream protection, please order the reference twice. For the single-phase version (2P) please order the reference once. (2) 1 NO/NC contact block for positions I, $O$ and II.
    (3) For 127/230 VAC networks, please contact your SOCOMEC office.

[^2]:    (1) The three-phase version (4P), for upstream and downstream protection, please order the reference twice.
    (2) 1 NO/NC contact block for positions I, $O$ and II.
    (3) For 127/230VAC networks, please contact your SOCOMEC office.

[^3]:    For complete conversion, order 3 times the reference.

[^4]:    1 preferred source
    2 alternate source

[^5]:    (1) Category with index $A=$ frequent operation -

    Category with index $B=$ infrequent operation.
    (2) For a rated operational voltage $U_{e}=400$ VAC.
    (3) Between the command given and reaching of position at $U_{n}$ (under nominal conditions).
