## Description

- Passive infra-red motion detector for ceiling installation
- Circular detection area $360^{\circ}$, up to Ø $24 \mathrm{~m}\left(452 \mathrm{~m}^{2}\right)$
- Restriction of detection area with cover clips
- Automatic motion and brightness-dependent control for lighting
- Mixed light measurement suitable for fluorescent lamps (FL/PL/ESL), halogen/incandescent lamps and LEDs
- Channel A light: relay, 230 V
- Operation as fully automatic device
- Brightness switching value configurable, teach-in function
- Pulse function for staircase light time switch
- Time delay configurable
- Detection sensitivity configurable
- Ready for immediate use due to factory presetting
- Test mode for checking function and detection area
- Ceiling installation in flush-mounted socket
- Ceiling installation possible with back box, IP 54 (option)
- User remote control theSenda S (option)
- Management remote control SendoPro (option)
- Installation remote control theSenda P (option)

## Technical data

| Operating voltage | $110-230 \mathrm{~V} \mathrm{AC}$ |
| :--- | :--- |
| Frequency | $50-60 \mathrm{~Hz}$ |
| Installation height | $2-10 \mathrm{~m}$ |
| Installation type | Ceiling installation |
| Colour | White |
| Switching output | Light |
| Power consumption | $\sim 0,15 \mathrm{~W}$ |
| Light measurement | Mixed light measurement |
| Setting range brightness | $30-3000 \mathrm{Ix}$ |
| Light switch-off delay | $10 \mathrm{~s}-60 \mathrm{~min}$ |
| Type of contact light | Relay $230 \mathrm{~V} / 10 \mathrm{~A} \mu-$ contact |
| Lamps | Incandescent/halogen lamps, fluorescent lamps, Energy saving lamps, LEDs |
| Incandescent/halogen lamp load | 2300 W |
| Compact and flourescent lamps | 1150 VA (cos $\varphi=0,5$ ) |
| Inrush current | max. $800 \mathrm{~A} / 200 \mu \mathrm{~s}$ |
| LED lamp < 2 W | 60 W |
| LED lamp 2-8 W | 180 W |
| LED lamp > 8 W | 200 W |
| Type of connection | Screw terminals |
| Max. cable cross section | max. $2 \times 2,5 \mathrm{~mm}{ }^{2}$ |
| Detection range | $452 \mathrm{~m}^{2}\left(\varnothing 24 \mathrm{~m} / 360^{\circ}\right)$ |
| Ambient temperature | $-15^{\circ} \mathrm{C} \ldots+50^{\circ} \mathrm{C}$ |
| Type of protection | $\mathrm{IP} 54($ when fitted $)$ |

Article number: 1030600

## Description

1 Mixed light measurement
2 Motion detection
3 Artificial light
4 Incident daylight

[^0]Channel A light
Switching response is controlled by presence and ambient brightness. The switch contact for channel A light closes during darkness and when someone is present. It opens with a delay once the room is vacated after the set time delay. Time delay
The time delay enables delayed switching off of lighting after the room is vacated. The time delay is adjustable in a range of 10 s to 60 min .
Fully automatic
Lighting control of the motion detector operates fully automatically for increased comfort. In "fully automatic" the lights switch on and off automatically.

## Pulse function

Time delay can be set to pulse for controlling existing staircase light timer switch. To do so, the light output produces every 10 seconds a pulse of 0.5 seconds duration if people are present or it is dark.

## Connection example

## Switching

The motion detectors are operated as a master in individual switching. With parallel switching of the light outputs (L'), it must be ensured that all detectors connected in parallel are connected to the same phase.
Individual switching
In individual switching, the motion detector as master detects presence and brightness and controls lighting.

Parallel switching of several motion detectors

- Connect switch contacts of several detectors directly.
- Set brightness switching value and time delay on all detectors.
- The permitted overall load is not increased.

## Detection range

The circular detection area of theMova P motion detector covers a large detection area, and permits a complete room coverage with many applications. Note that moving persons can be detected in differently-sized areas. The recommendedinstallation height is $2.0 \mathrm{~m}-6.0 \mathrm{~m}$. As installation height increases, the sensitivity of the presence detector decreases. The extent and distance between the active and passive zones of the motion detector also increases. The detectionrange is reduced as the temperature increases.

| Mounting height <br> $(\mathrm{A})$ | Head on to (r) | Diagonally (t) |
| :--- | :--- | :--- |
| 2 m | $28 \mathrm{~m}^{2} \mid 6 \mathrm{~m}$ | $380 \mathrm{~m}^{2} \mid 22 \mathrm{~m}$ |
| $2,5 \mathrm{~m}$ | $38 \mathrm{~m}^{2} \mid 7 \mathrm{~m}$ | $415 \mathrm{~m}^{2} \mid 23 \mathrm{~m}$ |
| 3 m | $50 \mathrm{~m}^{2} \mid 8 \mathrm{~m}$ | $452 \mathrm{~m}^{2} \mid 24 \mathrm{~m}$ |
| $3,5 \mathrm{~m}$ | $50 \mathrm{~m}^{2} \mid 8 \mathrm{~m}$ | $452 \mathrm{~m}^{2} \mid 24 \mathrm{~m}$ |
| 6 m | $50 \mathrm{~m}^{2} \mid 8 \mathrm{~m}$ | $452 \mathrm{~m}^{2} \mid 24 \mathrm{~m}$ |
| 10 m | $50 \mathrm{~m}^{2} \mid 8 \mathrm{~m}$ |  |

## Brightness Measurement

The motion detector measures artificial light and daylight that is reflected directly below the detector. The light measurement area maps a rectangle of about $2 \times 3.5 \mathrm{~m}$ at table height. The installation location is a reference point for the lighting level. Direct light influences the light measurement. Avoid placing floor lamps or suspended lighting directly below the detector. If the brightness measurement is deactivated, the light channel only switches depending on the presence (brightness switching value set to "lux on" via potentiometer or set to "measurement off" via the remote control).
Suitable lamps
The motion detector is designed for the operation of fluorescent lamps, compact fluorescent lamps, halogen/incandescent lamps and LEDs. The maximum number of switchable lights is restricted due to the high inrush current levels of the EBs and LED drivers. The use of an external contactor helps with large loads. All switched loads must be properly suppressed.

## Flush-mounted installation

The flush-mount installation of the detector is done using a standard UP (flushmount) installation socket Size 1.
Ceiling installation
A ceiling installation unit is available for a simplified ceiling installation of the detector (see accessories). This ensures strain relief and contact protection at the same time. The installation diameter is 72 mm (drill diameter 73 mm ).
Surface-mount installation
A suitable surface-mount frame is available for surface installation (see accessories).
